# Replacement Blade CB-1S — Ø20 mm Multi-Fit Cleaver Blade

One blade pattern for many Sumitomo and Furukawa models, and for Chinese-made cleavers of every brand.

Most cleavers in the field turn the same disc: 20 mm across, 3 mm thick, with a numbered ring of cutting positions. The CB-1S is that disc — our own blade for the many Sumitomo and Furukawa (FITEL) cleaver models built around it, and for the Chinese-made cleavers that share the pattern.

CB-1S — Ø20 mm diameter, 3 mm thick

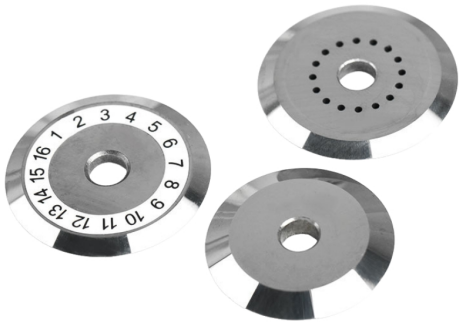

### Key Features

- Our own CB-1S — the Ø20 mm x 3 mm blade pattern shared by many Sumitomo and Furukawa cleavers and Chinese-made cleavers of many models
- Numbered position ring — 12 or 16 cutting positions by variant
- Plain-centre and position-hole ring variants, matched to your cleaver when you order
- Field-replaceable by the user in minutes
- Private labeling made to your requirements — your labels, part numbers and barcodes on the inner boxes and outer cartons

| | |
|---|---|
| **Fits** | Many Sumitomo and Furukawa (FITEL) cleaver models, and Chinese-made fiber cleavers built for the Ø20 mm blade — matched by pattern |
| **Blade diameter** | 20 mm |
| **Blade thickness** | 3 mm |
| **Cutting positions** | 12 or 16, by variant |
| **Replacement** | Field-replaceable by the user |

## Two Views

Numbered-ring and plain variants

12- and 16-position variants, with and without position holes

## In Use

Match the pattern, not the badge: count the positions on your old blade (12 or 16), check whether its ring carries position holes, and fit the matching CB-1S variant. Send us the cleaver model or a photo of the blade and we will match it for you. When the last position is spent, the swap takes minutes in the field. Compatibility: aftermarket replacement blade, our model CB-1S — not an original Sumitomo or Furukawa part. Sumitomo and Furukawa are trademarks of their respective owners, used only to describe the cleavers this blade pattern fits.

## Private Label & OEM

The K-CB550R is supplied in neutral, unbranded stock as standard. Private labeling is made to your requirements — labels with your logo, part numbers and barcodes on the inner boxes and outer cartons, so the goods arrive ready for your warehouse. Custom barcode & contract labeling is applied to every inner box and outer carton to your receiving specification.

## In the Box

CB-1S replacement blade x1 (variant matched to your cleaver).
