Replacement Blade CB-6S for Sumitomo R-Series Cleavers

Our Ø20 mm tungsten blade for the FC-6RS, FC-6R+, FC-7R and FC-8R — rated for 78,000 cleaves.

The consumable behind Sumitomo's auto-rotating cleavers: our CB-6S, a Ø20 mm tungsten steel disc made to the pattern the FC-6RS, FC-6R+, FC-7R and FC-8R take. Twenty-four positions worked in turn, 78,000 cleaves per blade, and a swap the crew does itself.

CB-6S — Ø20 mm tungsten steel blade

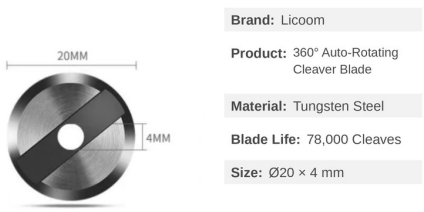

Key Features

- Our own CB-6S — the blade for Sumitomo FC-6RS, FC-6R+, FC-7R and FC-8R auto-rotating cleavers
- Tungsten steel, Ø20 mm x 4 mm thick
- 24 cutting positions on the 360° auto-rotating pattern
- Rated for 78,000 cleaves
- Field-replaceable by the user — no service center
- Private labeling made to your requirements — your labels, part numbers and barcodes on the inner boxes and outer cartons

CB-6S blade — brushed tungsten steel disc

In Use

Sumitomo's R-series cleavers rotate the blade automatically, working through its 24 positions so the edge wears evenly around the disc. When the last position is spent, fit this replacement: the cleavers are designed for the user to change the blade in the field. Keep a spare in every cleaver case. Compatibility: aftermarket replacement blade, our model CB-6S — not an original Sumitomo part. Sumitomo and the cleaver model names are trademarks of Sumitomo Electric Industries, used only to identify compatibility.

Private Label & OEM

The K-CB550R is supplied in neutral, unbranded stock as standard. Private labeling is made to your requirements — labels with your logo, part numbers and barcodes on the inner boxes and outer cartons, so the goods arrive ready for your warehouse. Custom barcode & contract labeling is applied to every inner box and outer carton to your receiving specification.
