Replacement Cleaning Core K-CB550R

The spare core for the K-CB550 cleaning box — when the tape is spent, swap the core, not the box.

A cassette cleaner is only as good as its tape. The K-CB550R is the factory replacement core for the K-CB550 box: the same special dry microfiber tape, the same 550+ cleans, dropped in with no tools — the box goes back to work instead of into the bin.

K-CB550R — spare core in its tray, with refill packs

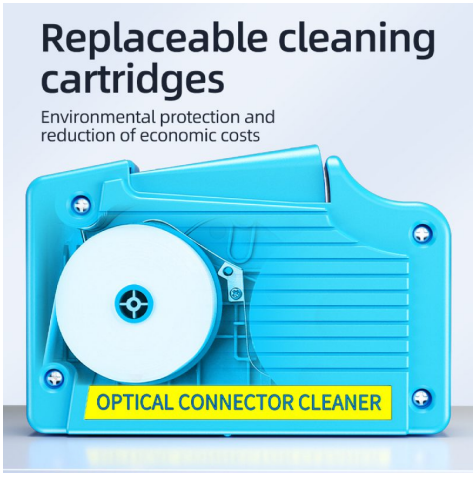

Key Features

- The factory core for the K-CB550 cleaning box — same tape, same fit, swapped with no tools
- 550+ cleans per core on special dry microfiber tape — no alcohol, no residue
- Covers the box's full range: 2.5 mm and 1.25 mm ferrules, UPC and APC end faces
- Restores the box to day-one cleaning instead of retiring it
- One spare core per box keeps field crews cleaning when the fitted core runs out
- Private labeling made to your requirements — your labels, part numbers and barcodes on the inner boxes and outer cartons, ready for your warehouse

The core in place — lift out, drop the new one in

The K-CB550 box this core keeps working

In Use

Open the K-CB550 case, lift the spent core out and drop the new core in — seconds, no tools, nothing to adjust. The box then cleans exactly as it did when new: seat the connector in the slot, wipe, advance the lever for fresh tape. Keep one spare core with every box in the field and a cleaning station never stops mid-job for want of tape.

Private Label & OEM

The K-CB550R is supplied in neutral, unbranded stock as standard. Private labeling is made to your requirements — labels with your logo, part numbers and barcodes on the inner boxes and outer cartons, so the goods arrive ready for your warehouse. Custom barcode & contract labeling is applied to every inner box and outer carton to your receiving specification.
