Coaxial Compression Tool K-CX59

A compression tool for F-type connectors on RG59, RG6 and RG11 — one squeeze presses the sleeve home for a weather-tight, pull-proof termination.

A compression tool for F-type compression connectors on RG59, RG6 and RG11 coaxial cable. Its axial stroke presses the connector sleeve home in one squeeze, and the plunger screw adjusts for different connector brands.

Key Features

- Made for F-type compression connectors on RG59, RG6 and RG11 coax
- Axial compression action — no dies to change between cable sizes
- Adjustable plunger screw adapts the stroke to different connector brands and lengths
- Lever linkage multiplies hand force, so big RG11 connectors seat without a fight
- Steel body, black finish, blue moulded grips
- Retail blister packing, or bulk for installer kits

K-CX59 coaxial compression tool for F-type connectors RG59 RG6 RG11

Closed, reverse side

In Use

Fit the connector on the prepared cable, seat it in the head and squeeze once. Set the plunger stroke on a test connector whenever you change connector brands.

Private Label & OEM

Supplied in neutral, unbranded stock as standard. Private labeling is made to your requirements — labels with your logo, part numbers and barcodes on the inner boxes and outer cartons, so the goods arrive ready for your warehouse. Custom barcode & contract labeling is applied to every inner box and outer carton to your receiving specification.
