K-KIT01 Fiber Optic Tool Kit

Built around your work — the tool selection is configured to each customer's requirements, carried in a light shoulder tool bag. The standard configuration is listed below; contents can be adjusted to order.

The K-KIT01 is the light kit: a shoulder bag holding the tools a technician reaches for most — fiber preparation and connector cleaning — without the weight of a hard case. It is not a fixed box of tools: tell us what your crews install and maintain, and the contents are picked around that job — tools added, swapped or left out, with your label on the bag if you want it. The standard configuration below is the starting point: ten items covering Kevlar cutting and the full stripping chain — tri-hole, precision, mid-span and large-diameter strippers, plus heavy-duty pliers — together with a full cleaning group: a cassette connector cleaner, one-click cleaners for 2.5 mm and 1.25 mm ferrules and an alcohol bottle.

K-KIT01 — standard configuration, bag and tools

Key Features

- Built around your job — the contents are not fixed: the tool selection is configured to your crew's work and your requirements, with your label on the bag if you want it
- Soft shoulder bag in waterproof fabric with a woven shoulder strap and metal hardware — 240 x 100 x 180 mm, and the empty bag weighs just 0.5 kg, so the kit rides on the shoulder instead of filling a hand
- Cleaning rides with the tools, not in a separate case: a cassette connector cleaner, one-click cleaners for both 2.5 mm and 1.25 mm ferrules and an alcohol bottle are part of the standard set
- The preparation chain is covered too: Kevlar scissors, a tri-hole stripper, a precision stripper, mid-span and large-diameter strippers, and heavy-duty pliers
- Every tool in the set is also available on its own, so a lost or worn tool can be replaced without buying a whole new kit

Specifications

Case	Soft shoulder tool bag — waterproof fabric, woven shoulder strap, metal hardware
Set size	10-item standard configuration
Customization	Contents configured to order; private label available
Dimensions	240 x 100 x 180 mm (tool bag)

4. Mid-span stripper — 1 pc	9. Alcohol bottle — 1 pc
5. Large-diameter stripper — 1 pc	10. Carry bag — 1 pc

The Bag — Dimensions & Construction

Bag dimensions and construction — 240 x 100 x 180 mm, waterproof fabric, woven shoulder strap, metal hardware

The bag is the point of this kit: a soft shoulder bag in waterproof fabric with a woven shoulder strap and metal fittings, sized for the daily carry — large enough for the preparation tools and the cleaning group, light enough to stay on the shoulder between jobs. Zippered pockets keep the set together in the van and on site.

OEM & Private Label

The K-KIT01 can carry your brand. Private labeling is made to your requirements — labels with your logo, part numbers and barcodes on the tools, the inner boxes and the outer cartons, so the goods arrive ready for your warehouse. Custom barcode & contract labeling is applied to every inner box and outer carton to your receiving specification.
