K-KIT03 Fiber Optic Tool Kit

Built around your work — the tool selection is configured to each customer's requirements, carried in a red plastic tool box. The standard configuration is listed below; contents can be adjusted to order.

The K-KIT03 pairs the fiber tools with a full set of general installation hand tools in one red tool box — a practical mix for FTTH installation crews who also handle the general work on site, so the box that strips and prepares the fiber also carries the pliers, wrenches, drivers and test meter the rest of the job calls for. It is not a fixed box of tools: tell us what your crews install and maintain, and the contents are picked around that job — tools added, swapped or left out, with your label on the case if you want it. The standard configuration below is the starting point: 26 pieces covering the fiber strippers, Kevlar scissors and cable cutter, the general hand-tool bench, a digital multimeter and voltage tester, and the consumables a crew uses up.

K-KIT03 — standard configuration, case and tools

Key Features

- Built around your job — the contents are not fixed: the tool selection is configured to your crew's work and your requirements, with your label on the case if you want it
- Fiber tools plus the general bench in one box: fiber and cable strippers, Kevlar scissors and a cable cutter ride with combination and needle-nose pliers, diagonal cutters, an adjustable wrench, and screwdriver, hex key and socket sets
- Electrical checks covered: a digital multimeter and a voltage tester for panels and cabinets, with a flashlight for the dark corners of the job
- Fitting work included: a tube cutter and hacksaw for tube and conduit, a hammer and a utility knife for the general work around the fiber installation
- Red/black plastic tool box (430 x 260 x 215 mm) with organizer compartments in the lid — ties, tape and small parts stay sorted, and the empty case weighs 2.1 kg. Beige and grey-blue plastic cases are also available as case options — see the gallery — and further case colors can be made to order for quantity orders
- Every tool in the set is also available on its own, so a lost or worn tool can be replaced without buying a whole new kit

Specifications

Case	Red/black plastic tool box — organizer compartments in the lid, 430 x 260 x 215 mm; beige and grey-blue case options also available, further case colors made to order
Set size	26-piece standard configuration

Case Options

Case options — beige and grey-blue plastic cases

The standard set ships in the red/black tool box above, with organizer compartments in the lid for the small parts and consumables. Beige and grey-blue plastic cases are also available as case options, as shown, and further case colors can be made to order for quantity orders — tell us which case you want and the same configured contents are packed into it.

OEM & Private Label

The K-KIT03 can carry your brand. Private labeling is made to your requirements — labels with your logo, part numbers and barcodes on the tools, the inner boxes and the outer cartons, so the goods arrive ready for your warehouse. Custom barcode & contract labeling is applied to every inner box and outer carton to your receiving specification.
