K-KIT04 Fiber Optic Tool Kit

Built around your work — the tool selection is configured to each customer's requirements, carried in a green padded soft case. The standard configuration is listed below; contents can be adjusted to order.

The K-KIT04 is the complete splicing-prep kit: one green padded case that carries the whole chain — test, clean, strip and cleave — so a crew can prep and splice on site without a second bag. It is not a fixed box of tools: tell us what your crews install and maintain, and the contents are picked around that job — tools added, swapped or left out, with your label on the case if you want it. The standard configuration below is the starting point: 22 pieces covering an optical power meter and visual fault locator for testing, a fiber cleaver, the stripping and slitting chain, and a cleaning group of cassette cleaner, one-click pens, alcohol bottles and lint-free wipes.

K-KIT04 — standard configuration, case and tools

Key Features

- Built around your job — the contents are not fixed: the tool selection is configured to your crew's work and your requirements, with your label on the case if you want it
- Test, prep and clean from one case: an optical power meter and a visual fault locator ride with the fiber cleaver, the strippers and the cleaning set — no second bag for splicing prep
- The full preparation chain is covered: tri-hole and drop cable strippers, a cable stripper, longitudinal and rotary armored slitters, Kevlar scissors and diagonal cutters
- Cleaning is built in, not an afterthought: a cassette cleaner, two one-click cleaning pens, alcohol bottles and lint-free wipes are part of the standard set
- Green padded soft case — semi-rigid and zippered, with a carry handle; lighter than a hard case for daily FTTH rounds
- Every tool in the set is also available on its own, so a lost or worn tool can be replaced without buying a whole new kit

Specifications

8. Longitudinal slitter — 1 pc	18. Fiber guides — 2 pcs
9. Rotary armored cable slitter — 1 pc	19. Carry bag — 1 pc

10. Cassette cleaner — 1 pc	

The Prep & Cleaning Set

Prep and cleaning configuration — strippers, slitters, cassette cleaner and one-click cleaning pens

Most of the kit's daily work is preparation and cleaning, and the set is laid out for it: strippers and slitters for every cable entry, a cassette cleaner and one-click pens for end-face cleaning, and the alcohol bottle alongside. Crews who splice all day can weight the kit toward prep; crews who mostly maintain can weight it toward test and cleaning — the configuration follows the job.

OEM & Private Label

The K-KIT04 can carry your brand. Private labeling is made to your requirements — labels with your logo, part numbers and barcodes on the tools, the inner boxes and the outer cartons, so the goods arrive ready for your warehouse. Custom barcode & contract labeling is applied to every inner box and outer carton to your receiving specification.
