Round Cable Jacket Stripper K-MK02

Ring and longitudinal slitting for round cables 4.5–28.5mm in PE, PVC and rubber.

One tool opens a round cable end to end. The K-MK02 slits PE, PVC and rubber jackets on cables from 4.5 to 28.5 mm: a knurled screw sets the blade to the insulation depth, a spring-loaded arm holds the cable in the cut, and the blade turns through 90 degrees for the lengthwise slit after the ring cut.

K-MK02 — depth knob and grip arm

Key Features

- Ring and longitudinal jacket slitting for round cables 4.5–28.5 mm
- Blade depth dialled in on the knurled adjuster screw — up to 3 mm of insulation
- Spring-loaded gripping arm holds the cable against the blade
- Ripping blade in the base for tough insulation; main blade replaceable
- Private labeling made to your requirements — your labels, part numbers and barcodes on the inner boxes and outer cartons

Specifications

Cable diameter	4.5–28.5 mm
Insulation thickness	Up to 3 mm
Jacket materials	PE, PVC, rubber
Cutting modes	Circumferential (ring) and longitudinal
Blade	Spherical profile, steel; replaceable (chisel point optional)
Blade depth	Adjustable — knurled screw
Extra tool	Ripping blade in the base, button release
Length	135 mm (5.3 in)
Weight	119 g (4.2 oz)

Details and dimensions

In Use

Set the blade depth to the jacket thickness on the knurled screw, lay the cable against the spring-loaded arm and rotate the tool for the ring cut. Press the button, the blade turns 90 degrees, and draw it along the cable for the lengthwise slit — the jacket then pulls clean away. Tough coverings get the ripping blade stored in the base.

Private Label & OEM

The K-MK02 is supplied in neutral, unbranded stock as standard. Private labeling is made to your requirements — labels with your logo, part numbers and barcodes on the inner boxes and outer cartons, so the goods arrive ready for your warehouse. Custom barcode & contract labeling is applied to every inner box and outer carton to your receiving specification.
