K-MPO One-Click MPO Cleaner Pen

One push cleans a whole MPO/MTP ferrule — all fibers at once, male or female — 500+ cleans a pen, no alcohol.

An MPO ferrule carries up to 24 fibers in one face, so one dirty ferrule can take out a whole trunk. The K-MPO cleans MPO and MTP end faces where they sit: centre the guide cap, push until it clicks, and fresh dry microfiber tape wipes every fiber position clean. Male and female, in the adapter or in the hand — one pen, more than 500 cleans.

K-MPO — blue, white and green body colours

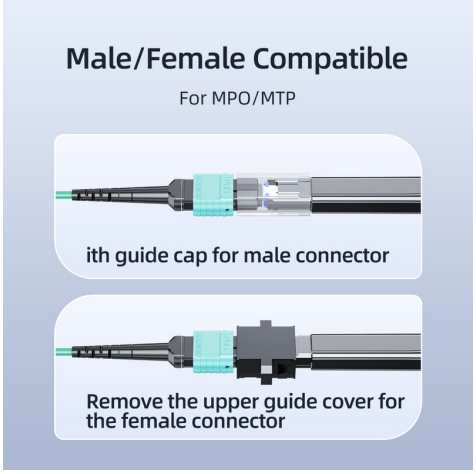

Key Features

- A whole ferrule in one push: the tip wipes every fiber position on the MT face at once — 8, 12 or 24 fibers cleaned in a single click
- Male and female with the same pen: guide cap on for pinned connectors, upper guide cover removed for unpinned connectors and ports in adapters
- 500+ cleans per pen, with fresh dry microfiber tape at every push — no alcohol, no solvents, no residue
- PC, UPC and APC MPO/MTP end faces, in the adapter or held in the hand
- Long slim nose for high-density panels; cleaning tape visible through the body window
- Private labeling made to your requirements — your labels, part numbers and barcodes on the inner boxes and outer cartons, ready for your warehouse

Specifications

Connectors	MPO and MTP — male (pinned) and female (unpinned)
Fiber counts	8, 12 and 24 fiber MT ferrules
Polish types	PC / UPC and APC

Cleaning medium	Dry microfiber tape — no alcohol or solvents
Cleaning targets	Adapter-mounted and exposed connector end faces
Guide cap	On for male connectors; remove the upper guide cover for female connectors
Body	Antistatic resin in blue, white or green, with visible cleaning-tape window

Two Views

Male and female: guide cap on, or upper cover removed

The cleaning tip and microfiber tape

In Use

Centre the guide cap on the connector — over the pins of a male connector, or with the upper guide cover removed for a female connector or a port in an adapter — and push until it clicks. Fresh microfiber tape wipes across every fiber position on the ferrule face and advances on its own for the next connector. Keep the cap on between jobs; when the tape visible in the window is finished, replace the pen — it is a consumable, not a tool to refill.

Private Label & OEM

The K-MPO is supplied in neutral, unbranded stock as standard. Private labeling is made to your requirements — labels with your logo, part numbers and barcodes on the inner boxes and outer cartons, so the goods arrive ready for your warehouse. Custom barcode & contract labeling is applied to every inner box and outer carton to your receiving specification.

In the Box

One K-MPO one-click MPO cleaner pen (body colour as ordered: blue, white or green), in its retail box.
