MINI SC Waterproof Fast Connectors KW-08 — IP68 Field Installable

Hardened MINI SC connectors with an IP68 shell — fast-connector termination inside, weatherproof outside, for outdoor drops and taps.

The last connector on an FTTH drop lives outdoors, and a bare SC in the weather is a callback waiting. KW-08 puts the field-assembly SC — the same pre-polished joint as KW-01 — inside a sealed MINI SC hardened housing: terminate the drop, close the shell, and the connection is IP68 with its cap tethered for the next visit.

KW-08 — KW-08 MINI SC waterproof connector set with green SC/APC inner connector

Key Features

- Our own KW-08 — Hardened MINI SC connectors with an IP68 shell
- APC (green inner) and UPC (blue inner) versions
- Cable versions for 2.0 / 3.0 / 5.0 mm round and 2×3, 2×1.6, 2×5 mm flat drop — the drop is terminated and weatherproofed in one part
- Hot-melt (splice-on) inner version also available for crews who fuse
- Private labeling made to your requirements — your labels, part numbers and barcodes on the bags, boxes and cartons

In Use

Strip and cleave with the length-setting jig where the family uses one, terminate as the construction directs, and test. Order by polish (APC or UPC) and by the exact cable you are terminating — flat drop or round, with its size — and the connectors arrive matched to the job, in bulk or in your packaging.

Private Label & OEM

The K-CB550R is supplied in neutral, unbranded stock as standard. Private labeling is made to your requirements — labels with your logo, part numbers and barcodes on the inner boxes and outer cartons, so the goods arrive ready for your warehouse. Custom barcode & contract labeling is applied to every inner box and outer carton to your receiving specification.

In the Box

KW-08 waterproof connector set ×1 (polish and cable version as ordered).
